## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-19, 21 are allowed.

Claims 1-19, 21 are allowable over the prior art of record for at least the reason that even though the prior art discloses color wheel assemblies comprising a color disk mounted between two carriers, the prior art fails to teach or reasonably suggest, regarding claims 1-16, a color wheel comprising a first carrier having at least a first aperture positioned off of the central axial line, a filter zone which has a bonding zone having at least a second aperture positioned off of the central axial line, and at least one connection component simultaneously mounted in the first aperture and the second aperture, regarding claims 17-19, a method for making a color wheel comprising the steps of forming at least a first aperture, which is positioned off of a central axial line of a filter, forming at least a second aperture in a filter bonding zone of the filter group, which is positioned off of the central axial line, and connecting a connection component to the first aperture and the second aperture, and regarding claim 21, a color wheel comprising, a first carrier having a first aperture, a filter group, which has a filter bonding zone having a second aperture, and a connection component including an adhesive component simultaneously mounted in the first aperture and the second aperture, as set forth by the claimed combination.
